This and other similar concerns are already owned by Swift interests, but it is suggested that Swift & Co. now buy out the Swift family interests in these concerns after the fashion of former deals.

The chief thing with which La falle street is concerned to-day was the fact that it had been left for the "licker" to tell the story of the stock increase before the official notice was given. It is known pretty definitely that officials have sold against prospective rights on the new stock. This suggests pointedly that any "melon" that might have been cut for the shareholders has already been cut by insiders.
